DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 10/589,430

Art Unit: 1772

Claims 1, 6-7, 11-16, 21, 30-31 and 36-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tadigadapa et al. (US 6,477,901) in view of Sparks (USPN 6,647,778).

Page 3

Tadigadapa teaches a calorimetric device comprising a U-shaped calorimeter tube having an inlet end and an outlet end (figure 1-4), and mounted onto a support at the inlet end and the outlet end (fig. 1-4); wherein the calorimeter tube comprises a bimetallic layer that bends in response to detects a temperature change in the calorimeter tube (col. 3, lines 50-55, thermally based actuation, shape memory alloy); a capacitive sensor that detects the bending of the bimetallic layer (col. 3, line 56-col. 4, line 11.

Tadigadapa does not specifically teach an integrated heating device that provides current through the bimetallic layer to heat the calorimeter tube.

Sparks teaches a calorimetric device comprising a u-shaped calorimeter tube (14) having an inlet (26) and outlet (28), a temperature sensor comprising a metal layer of the type to form the electrodes (fig. 5, ref. 70) (col. 3, lines 30-67; col. 6, line 56-col.7, line 57). Further, Sparks discloses an integral heating device (electrodes 70) to keep the temperature of the tube 14 and the fluid flowing therethrough and a constant temperature (col. 6, line 65-col. 7, line 15). Tube 14 has lengths of about .5mm and cross sectional areas of about 250 um²(col. 4, line 15-22). Sparks discloses a material that is a reflector (metal col. lines 41-42). It would have been obvious to one having an ordinary skill in the art at the time of the invention to modify Tadigadapa to employ an

Art Unit: 1772

integrated heating device on the bimetallic layer to keep the calorimeter tube at a constant temperature.

Response to Arguments

Applicant's arguments with respect to claims 1, 6-7, 11-16, 21, 30-31 and 36-37 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SAM P. SIEFKE whose telephone number is (571)272-
